

Starting up:

First listen your favourite piece with your system.  
After that change SpinX cables to your system and listen  
the same piece again.

If the stereo image is still "blurred" let the music play for  
longer time. The spin-current haven't reached your  
amplifier yet. In some cases this can take up to 1-2  
hours. Normally you can hear the difference  
immediately.

Warranty:

Warranty covers material and workmanship faults.  
Return the faulty product to your seller and you will get  
new product free of charge. The product has to be  
unopened and the seal of the screws has to be intact.

## WHY SPINX CABLES SOUND BETTER

### **The technological effect of SpinX cables:**

Spin signal is more lossless and faster.

Spin electrons magnetism copies itself to other cables and equipment's.

SpinX cables will function with every audio equipment.

They will improve sound quality and performance of sound sources also.

The power feed abilities and transients of amplifiers will improve significantly.

Those spin-effects mentioned above have come up in every studies of spintronics around the world.

In addition SpinX – cables will reduce energy consumption.

### **Sound quality effect of SpinX-cables:**

More resolution means more details from the recording. Better, faster and more focused transient. Especially the bass frequencies will be improved.

SpinX eliminates group delay. All the frequencies run at the same speed.

Stereo image is more precise, more three dimensional and natural sized.

### **SpinX Power Cable 1.5 / 2.7**

Length 1,5 / 2,7 meters

Schuko plug is rhodium coated

Standard IEC plug

CE approved
